trees.

Orchardists are resorting more and more to the planting of varieties of Cherries that are strong pollenizers. Experience seems to demonstrate that such varieties as Black Oregon, Black Tartarlan, Black Republican, and Centennial are the hest varieties to use for this purpose. Usually about one in every nine trees has proven to he they alway appearance.

ENGLISH MORELLO — Medium to large;

plackish red, rich, acid, juicy and good.

LATE DUKE — Fruit large, roundish, rich,

First of June.

MONTMORENCY—Large. Tree very hardy and

immense bearer, fruiting young; regular bearer of fine crops; fruit large, fine flavor, shibing red, valuable everywhere.

ROYAL DUKE — Early sour cherry, large, handsome, bright red fruit. After May Duke.

handsome, bright red fruit. After May Duke. Shipper.

Special Note to Commercial Orchardists—Many beautiful cherry orchards at 6 to 8 years old, quickly commence to die back and carry a lot of unhealthy wood structure, finally dyin, gout completely. Avoid this terrible loss of time and money by buying your commercial cherry orchard from reliable nurseryman. We offer the very finest of stock grown from certified bud selected sorts direct from the very finest cherry orchards in the west in The Dalles section. Wasco County, Oregon. We grow our cherry trees on whole roots of true mazzard stock. Many inferior cherry trees are offered annually by unreliable nurseryman. Buy only the best. Ours will stand the test of time.

YICTOR—Earliest and most profitable of all early peaches. Largest, smoothest, red skinned, white meated peach of excellent quality. Ships well.

ALEXANDER—One of the finest of the early ALEXANDER—One of the finest of the early peaches; greenish-white skin, shaded red; green-lsh-white flesh, very sweet and juicy. Early June.

MAYFLOWER—The earliest of all peaches. Medium sized, creamy white fruits, mottled with dark red; firm, white, juicy flesh.

HALES EABLY—One of the very best early white peaches. Skin greenish, splushed with red. Flesh white, juicy and sweet. Late June.

STRAWBERBY—One of the best and finest flavored peaches for home use. Small, white fruits, with beautiful red markings; flesh white, juicy, and delightfully flavored. A heavy bearer, ALTON—Early white semi-Freestone; almost a Freestone when ripe: one of hardiest surest bearers known; very large, white meated and most delicious fruit.

TRUMPII — An extra early yellow fleshed

TRIUMPII — An extra early yellow fleshed each. Skin very tender; juicy and sweet. July.

reestone. EARLY IMPERIAL—Late June-July. An early flow Freestone of excellent quality. Only a nall amount of fuzz. Ships well. Very similar CRAWFORD SPECIAL—Most wonderful of all early yellow meated Freestone Peaches, ripens two weeks before Early Crawford. Almost 100% fuzzless, beautiful hrilliant red markings. An immense bearer of excellent shipping and canning fruit. A real money maker. Comes before most Freestones can reach the market. Our own introduction.

YELLOW ST. JOHN-Fruit matures early.
Color, deep yellow, blushed and splashed with

earmine.
ROCHESTER—Has the habits and character. ROCHESTER—Has the habits and characterists of the Crawford, but fully two weeks earlier. Yellow, freestone, good size, very sweet and fine flavor. Requires only half the usual amount of sugar for canning. Does not rot on the trees.

CABMAN—A general favorite in nearly every peach region on this continent. It is a brilliant

red.

SLAPPY—Fruit yellow, good keeper; excellent lavor, fine grained, rich. Hardy, best medium early yellow peach. Super-quality.

ELBERTA QUEEN—Same as Slappy peach.

CRAWFOBD'S EARLY—Has all characterists

that gratify tasts. Color, rich red splashed and mottled with darker red and golden yellow. Fees is beautiful and perfectly free from stone. Matures in mid-season. Vigorous and productive. FOSTER—A Yellow Freestone of the Crawford

ripening three days later, much smoother and a heavier bearer. It is a rich yellow meated Free-stone canning peach and bears very regular in

he Northwest.
IMPROVED EARLY ELBERTA—This peach is the "Queen" of all canning peaches, and no doubt the biggest selling peach on the market. Fruit is a beautiful golden yellow, blending into a glorious deep pink on the sunny side; a strong protecting skin; exceptionally heavy bearer and a wonderful pollenizer for the J. H. Hale. Ripens about two weeks earlier than Elberta. A truly

about two weeks earlier than Elberta. A truly super-quality canning peach.

FITZGERALD — Fruit large, brilliant color, bright yellow, suffused with red; flesh deep yellow, hest quality.

J. II. HALE — Peach growers have demonstrated during the past several years that this is a profitable variety. Fruit is of largest size, highly colored; flesh is yellow, exceedingly firm and yet tender when eaten; flavor is unexcelled. Fruit ships exceedingly well; remains on the tree in a firm condition for a longer time than any other freestone.

EABLY ELBERTA — Ripens about a week arlier than Elberta; otherwise the same.

ELBERTA — Large yellow, with red cheek; lesh yellow, firm, juicy, of high quality. Exceedingly prolific. Leading market variety, GOLDEN JUBILEE—The wonderful new yel-

CHAMPION—Best of white freestone varieties.

Flavor good.

LATE CRAWFORD — Shipping, drying, and mahard One of our bidest varieties, and note orchard. One or our oldest va still popular as a home orchard sor yellow freestone of excellent quality.

INDIAN BLOOD — Home use. A clingstone with deep red flesh. Popular for pickling and other culinary uses.

SOUTH HAVEN—A recent introduction. Immense size. Comes into market just before Elberta. Beautiful color and freestone. Very hardy and highly recommended.

P.M.ORO CLING—Early August. Commercial canning. Abmost identical to Peak, but a few days earlier Fruit large; flesh clear yellow, with only trace of red at pit. Good flavor. Tree

PEAK CLING - Early August Commercial

long period. Tree very productive,
SIMS CLING—Commercial canning. A late
mid-summer cling; large size and productive,
Nearly round; golden yellow, wilth faint blush.
Flesh deep yellow to the pit; of fine texture.
Fruit ripens from inside, and should be carefully
handled. andled.

RED BIRD—Commercial shipping. An early white flesh clingstone shipper. Fruit large, plashed with red, very attractive and aromatic.

ORANGE CLING—September. Home canning ind shipping. Fruit very large; attractive. Flesh tellow and of good quality. Very productive.

MUIB—Late August. Drying. Fruit large to very large. Skin yellow, easily peeled. Flesh clear yellow to pit, tender, sweet and mild. A good bearer; resistant to Curl leaf. SALWAY—September. Shipping, drying, and home orchard. Fruit large. Skin greenish yellow with blush. Flesh yellow, of fairly good quality.

LEMON CLING-Large size, lemon color. On of the best market varieties, on account of its firmness, size and excellent qualities. September. GOLDEN ELBERTA CLING—Quality superb,

LOVELL-Skin and flesh clear yellow: a heav

honey sweet juice and flesh—the most alluring quality of any clingstone—yet so firm, so solid, that it will ship almost any distance without breaking down. "The Finest Canning Peach in the World." KRUMMEL—October. One of the latest free-stone peaches and a profitable market variety. Fruit large, lemon yellow, lightly blushed with camine; flesh yellow, red at the plt; of excellent

Pears

The pear thrives over a wide range—being able to stand more summer heat than the apple. The French pear root also withstands beavy wet soils much better than most fruits. The popular Bartlett rules supreme as a summer pear, but some of our fall and winter varieties are even finer in quality and flavor, and all lovers of fine pears should include some of these in their home gardens. Unlike most other fruits, the pear develops much better quality when ripened off the tree, and the fruit should be picked before it begins to soften. Pears are planted, from 20 to 25 feet.

Bingleberry, the Newest and Hardiest of All Blackberries

All Blackberries
We offer this year for the first time, this wonderful new Blackberry, a cross between the wild Blackberry and Dewberry. In our opinion this is the finest, hardiest, most prolific of any Blackberry known. This berry bore a tremendous crop following the cold winter of 1932, when Loganberry, Youngberry and other Blackberries failed in this area.

berry, Youngberry and other Blackberries failed in this area.

The berries are large and long, jet black in color, practically seedless and without question the finest flavored berry for pie making that has ever been found. From a single crate of berries more than 14 quarts of solid pack fruit has been canned. We recommend this sort for any cold or warm area. or warm area.

Strong 2 year plan's: Each, 35c; 10, \$3,00; 100, \$20,00.

Plant the Wonderful New Acme Thorn-less Youngberry (Plant Patent No. 4)

The ACME THOUNLESS is superior to the parent thorny type only to the extent that the hard punishing and annoying thorns are not present. In other respects there is little difference, although under favorable conditions here a far greater yield in 1932 and 1933 than the thorny type in the same field.

Each, 25c; 10, \$2,00; 25, \$4,00; 100, \$10,00.

Horseradish Roots

Horseradish thrives everywhere. Prices: 6, 50c; 12, 75c; 25, \$1.00; 50, \$1.75; 100, \$3.00

Youngberries

This profitable new fruit yields 20,000 boxes per acre, and up to \$750 profits.

Prices: 1 year: Each. 15c; 5, 70c; 10, \$1.00; 100, \$4.00; 1000, \$25.00.

2 year: Each. 20c; 5, \$1.00; 10, \$1.35; 100, \$9.00; 1000, \$75.00.
